

## AMENDMENTS TO THE CLAIMS

Please cancel Claims 13 and 14 without prejudice to or disclaimer of the subject matter recited therein.

Please amend Claims 1, 3, 19, and 21 to read as follows:

1. (Currently Amended) A data receiving apparatus connected with a recording apparatus for recording a television broadcast program and booking to record the program, said data receiving apparatus comprising:

a receiving unit adapted to receive a television broadcast program;

an input unit adapted to input booking information about a program, recording of which is booked by a user instruction in said recording apparatus; and

a profile generation unit adapted to generate a user profile of ~~the common user of~~ said data receiving apparatus and the recording apparatus on the basis of (a) a view history of a broadcast program received by said receiving unit and (b) the booking information input by said input unit,

wherein said profile generation unit updates the user profile based on the booking information when the booking is not canceled in said recording apparatus, and does not update the user profile when the booking is canceled in said recording apparatus ~~the booking of~~ recording the program in said recording apparatus is based on a user instruction.

2. (Previously Presented) The apparatus according to claim 1, further comprising a searching unit adapted to search for a desired program in the television broadcast program received by said receiving unit based on the user profile.

3. (Currently Amended) The apparatus according to claim 1, wherein said input unit inputs booking cancellation information about a program for which booking is canceled in said recording apparatus, and wherein said profile generation unit updates said the user profile based on the booking cancellation information in accordance with the recording of the booked program being finished.

4 - 18. (Canceled)

19. (Currently Amended) A method for receiving a television broadcast program by a data receiving apparatus connected with a recording apparatus for recording a television broadcast program and booking to record the program, said method comprising:

a receiving step of receiving a television broadcast program;

an input step of inputting booking information about a program, recording of which is booked by a user instruction in the recording apparatus; and

a profile generating step of generating a user profile of ~~the common user~~ of the data receiving apparatus and the recording apparatus on the basis of (a) a view history of a broadcast program received in said receiving step and (b) the booking information input in said input step, wherein said profile generation step updates the user profile based on the booking information when the booking is not canceled in the recording apparatus, and does not update the user profile when the booking is canceled in the recording apparatus ~~the booking of recording the program in the recording apparatus is based on a user instruction.~~

20. (Previously Presented) The method according to claim 19, further comprising:  
a searching step of searching for a desired program in the television broadcast program received in said receiving step based on the user profile.

21. (Currently Amended) The method according to claim 19 ~~20~~, wherein said input step inputs ~~booking cancellation information about a program for which booking is canceled in the recording apparatus, and~~ wherein said profile generating step updates the user profile based on the booking ~~cancellation~~ information in accordance with the recording of the booked program being finished.

22 - 29. (Canceled)

30. (Original) A storage medium storing a program for realizing the method according to claim 19 using a computer.

31 - 32. (Canceled)
